miannebenchwork@gmail.com

This open grid style benchwork is ideal for all sizes and gauges of layouts. It will save you both time and money.

There is no longer any reason to spend valuable hobby hours figuring, selecting and cutting materials.

You can assemble your own custom **MIANNE** bench quickly with only a few hand tools.

Rectangular Starter Kits

Traditional rectangular shaped layouts that are great for any size room. These kits are a perfect starting point for the

beginning modeler or seasoned veteran that wants something to get the trains up and running. As the focus of your railroad changes these kits can be expanded or disassembled and reassembled into your dream layout.

Don't see a size that works for you? Give us a call and we'll design a kit just for you. There are no extra charges for custom sized kits, we just want to make sure we sell you what you need to get your trains out of the boxes and on the tracks. Incremental changes of 6" in any direction require no custom parts. Above prices based on standard 40" height or lower.

"I was able to change the configuration of the layout in minutes, making better use of the space in the room (my wife thanks you). Me? I get to try out another track-plan. Great product."
Steve R.

"With easy to follow color coded diagrams, assembly was very enjoyable. Assembly was easy and the hardware was top notch. About 12 hours later, we had the 28'x20' layout complete and level. Every stick was perfect out of the box and the fit was exact. The light weight construction was super strong."
Al Z.

Still not sure?

Check out our ST-4x8 assembly video on YouTube

It covers everything from opening the box to installing the hardware for attaching the top. Please scan this code and watch. You'll be amazed how easy Mianne Benchwork is assembled and how quickly you'll be laying the track for your layout.

Around the Room Layouts

Are you looking to build a layout that features continuous running trains? These room filling kits may be just what you're looking for. Check out the chart below for a size that will work in your layout room. None of the sizes quite fit your area? Give us a call and we'll modify any kit so it will work in your home. Don't forget: All *MIANNE* kits and parts can be combined for unlimited layout design possibilities. Because *MIANNE* is changeable and expandable you can start at any size and add to your layout as time and budget permit.

All above prices based on standard 40" height or lower

Did you see a layout plan in a magazine or plan book ? Call us and we will quote you a price on a benchwork that will work with both the track plan and the area you have available in your home. There is never any need to waste time trying to figure out what you need, we can do it for you and insure you only buy what you really need! Another reason *MIANNE* is the best benchwork system anywhere!

Mianne Multi Deck

Bring Your Layout to a Whole New Level

Let **Mianne Multi-Deck Benchwork** add a whole new dimension to your dream layout. Now you can easily add an additional railroad without using more space in your home. Maybe a different scale or different era. How about that small logging railroad you always wanted but didn't fit in with your main layout plans. **Mianne Multi-Deck** is the perfect answer and can be added to any of our kits. Available in 3 depths: 12", 18" and 24". Cantilevered brackets come ready to install with all necessary hardware included. Any Mianne kit can be made "2nd level ready" just by using taller upper level legs where future expansion is planned for.

Cantilevered design means no obstructions on main level.

Creates a great place to install lighting for main layout.

Solid one piece hardwood legs and finish plywood brackets for superior strength and stability.

Great for storage, test tracks or even another separate layout.

Same great quality and easy assembly **Mianne Benchwork** is famous for.

Model ST-6X16 with 4x11 octagonal upper level this is a great option for putting two walk around layouts in a single space!

Existing **Mianne** layouts can be upgraded to multi-deck just by swapping out the legs in the section where the upper level is desired. Works with all **Mianne Benchwork** I-beams. Call today and we'll help you get started!

- Unique cantilevered design
- Can be added to any Mianne Benchwork kit
- High quality hardwood plywood
- Same quick and easy Mianne assembly
- Increases layout space
- More benchwork means more trains means more fun!
- Upper level at 58" or 54"

Model ST4 x 12

Most modelers are limited as to how much space is available for their layout. More often than not there is far less space available than is desired. By adding a second level an amazing amount of new space can be had.

For example our starter set model 4x12 has a total layout size of 48 square feet. By adding our 24" cantilevered upper level it's increased to 84 square feet, an increase of 75%. The amount of upper level layout can be customized to suit your needs.

Model ST4 x 12

Model WT 1016-30

You may only want to add an upper level to part of your layout. No problem, with Mianne you never buy more than you need. In this example we have added a second level to our model WT1016-30 Walk-Thru kit.

Even this partial upper level adds 62 square feet, an addition of almost 2 full 4x8 layouts!

Individual Part Pricing is shown in the table below

Model WT 1016-30

Part	Price
58" Leg	\$29.50
12" Bracket	22.00
18" Bracket	31.25
24" Bracket	31.25
Full Connector	5.75

Layouts shown with top for visual clarity (not included with kit)

Mianne Lift-Gate

Starting at
\$1029.00

**The ultimate in
Convenience!**

Vertical lift design means full scenery capability with no unsightly scenic gap in your layout! Easily supports all of your track & scenery materials.

The MIANNE Lift-Gate comes as a ready to assemble kit to replace a 5' section or opening in the benchwork without any modifications necessary. Currently available in 24", 30" & 36" depths. All hardware necessary for assembly is included. Many other widths also available.

- A) Electric drive motor
- B) High strength stainless steel cable
- C) Precision ball bearing slides
- D) 3/4" Recessed plywood motor mount (not included)
- E) Layout top (not included)

Mianne Lift-Gate

Do you want to run long trains, have space for a yard and continuous running? Maybe you just want to avoid the dreaded crawl under? Then the MIANNE Lift-Gate may be just what you need.

Down Position

Precision ball bearing slides for years of reliability

Using our standard 40" height legs you will get 64" of clearance for getting to the interior of your layout. The MIANNE Lift-Gate can be incorporated into one of our kits, a custom design or even retro-fitted into an existing MIANNE layout.

Up Position

And, best of all, as always, the same easy assembly and great quality that MIANNE Benchwork is known for!

Mianne Lift-Gate

Already have a layout and it's not Mianne? No problem, our Lift-Gates can be used as free standing units, all you have to do is create an opening large enough for the lift gate and crawling under is a thing of the past!

Motor can be installed on either side

Model LG-3060-FS shown \$1049.00

*many other sizes available with up to an amazing 41 3/4" wide opening

Requires 62" wide opening for installation

Including a turntable or transfer table in your layout that needs to be installed below grade? Mianne's adjustability will make this usually difficult task easy. Just let us know approximately where you want it located and we'll provide an adjustable section so you can locate it perfectly in your layout. Best of all, it's still stock Mianne, no extra custom charges. This is a great example of the convenience and flexibility that makes Mianne the best value in benchwork construction. Pre-fabricated or stick built, no benchwork construction method delivers like Mianne does!

Auto Indexing Precision Turntable provided by Mill River Studio

Mianne Lift-Gate Ready Kits

Love the idea of a lift-gate for your layout but it's just not in the budget?

Lift-Gate Ready version
Model WT1216B-36

Lift-Gate Ready version
Model AR916-36

Many of our kits can be made "Lift-Gate Ready" to make adding the lift-gate easy at a later date. Here's just a couple of examples of our stock kits that are Modified to be "Lift-Gate Ready". You won't find this option anywhere else. ***Many kits, both stock and custom can be made "Lift-Gate Ready"***

Mianne Control Accessories

Don't want to waste valuable layout real estate for your transformers and accessory controllers? Try one or both of these excellent Mianne exclusives!

Mianne Transformer Shelf

\$129.⁰⁰*

\$109 if ordered with any complete kit, stock or custom

*48"x12" shown, other sizes available, top not included

Can even be installed at layout height to expand your railroad empire without the need for additional legs

A Mianne Exclusive

\$139.⁰⁰

Price includes top and casters

36" x 12" x (30", 27" or 24" High Rollaway Transformer Cart)

Custom sizes available

Easily stores under layout when not in use!

TC-3612

I-beams and legs lock together with a simple half turn of a screwdriver. You can assemble, change and reassemble in minutes, never having to cut anything. There are no permanent modules or sections, all pieces can interchange for different configurations at any time.

Mianne I-beams are constructed of a hardwood frame with an MDF* web for exceptional strength and dimensional stability as well as light weight that no solid wood can match. Pre-drilled holes allow for cross member attachment or for installing wiring. (30" I-beam shown)

Legs are constructed from solid hardwood and include the unique **Mianne** multi-directional top with a fully adjustable leg leveling system built in. All mounting holes are accurately pre-drilled for easy frustration free assembly.

Quick lock cam fasteners are fast, strong and keep joints square for sturdy assembly. Pre-drilled mounting holes allow quick and precise attachment of **Mianne I-beams** for unlimited layout design.

*MDF — Medium Density Fiberboard: a composite construction material made from wood fibers glued under extreme heat and pressure.

Need a lowered section for a bridge or overpass scene? It's easy with Mianne, the possibilities are simple and endless!

Mianne Custom Layouts

Examples of customer layouts all using only stock MIANNE parts

5' x 7' overall

It doesn't matter how big or small an area you have for your layout. Designing your benchwork, finding good quality material and actually getting the benchwork built is not the easiest thing to accomplish (NO, those "premium" twisted 2x4's at the home center

are not a good idea). At *Mianne* we have designed and supplied hundreds of customers with better quality and better built benchwork than they would have ever built themselves.

Mianne can get you from just

7' x 10' overall

20' x 11' overall

dreaming about your layout to actually getting it built. All we need are some basic measurements of the area in your home, scale you are modeling and any features you want to incorporate into your track plan. We will provide you with a no obligation design and quote for your benchwork kit shipped right to

your home. If you have been putting off building your layout, it's time to stop just thinking about it, send us an email or give us a call. Running your trains is a whole lot better than

20' x 16' overall

just looking at them or worse just looking at the boxes they're in!

Frequently Asked Questions

1) Q. There doesn't seem to be a kit for the layout I want to build. What should I do?

A. Mianne Benchwork can be configured for any layout design. We offer a free, no obligation design service. You can either send us a track plan, room dimensions, or desired layout dimensions. We will then design a kit to work for you and quote you a price. The Mianne Benchwork system works in 6" increments for unlimited design possibilities. You can even combine different sizes for a truly custom layout. All kits, whether stock or custom, come with a detailed color-coded assembly plan for quick and easy assembly.

2) Q. How do I attach the layout to the benchwork?

A. We suggest attaching a 1/2" interior plywood platform for a base using the hardware included with your kit. This method will allow you to easily remove the layout from the benchwork at a later time. Anyone who has ever tried to change a layout or had to move a layout can appreciate this easy method.

3) Q. How do I attach risers for different track elevations?

A. After attaching your plywood base, you can easily add risers to the plywood for elevating track.

4) Q. What are connector blocks and adapter blocks?

A. Connectors are used to attach I-beams to other I-beams. Connectors allow attachment in three directions. Adapters are used as fillers for crosspiece attachment. See assembly instructions for diagrams.

5) Q. Can I purchase Mianne with a height different than the standard 40"?

A. Yes, we can make the height whatever you need. Just let us know when ordering.

6) Q. How is Mianne shipped?

A. We ship via standard UPS Ground Services. The largest box we ship in is 8"×8"×48" and usually weighs less than 50 lbs. (Kits with upper levels or brackets may require larger boxes)

7) Q. Can I purchase one section and add to it later on?

A. Yes. Try not to think of Mianne as modular but rather as a series of legs and I-beams that connect together to form one unitized structure. For example, if you wanted a 2'×4' section you would need to purchase a 24B expansion kit and a 24LS leg set. If you wanted a 2'×8' section you would need 2 24B sections but only one 24C. This benchwork would have six legs total.

8) Q. Why not just use solid wood for frame members instead of I-beams?

A. There are a few of reasons for utilizing a built up I-beam instead of solid wood.

1) Stability - every piece of wood is different and therefore reacts to seasonal changes differently. Our I-beams have a MDF core, with a hardwood frame. This creates consistent seasonal movement in all pieces. More stability equals more reliable trackwork and running of trains. In short: More Fun!

2) Consistency - the I-beams are produced on dedicated machines and are therefore consistent in tolerance. This makes for easy and reliable assembly.

3) Weight - we have achieved great strength with low weight. This makes for easy construction and helps keep shipping costs down. You'll appreciate it when your order arrives, that's for sure!
